PROFESSIONAL SUMMARY

A diligent full-stack web developer with eight months of professional experience in responsive web development in Python (Django) and joint 1.5 years of personal, volunteering and freelancing experience in mobile and frontend development using Javascript(React), React Native and Next JS. I'm focused on going above and beyond to provide the best solutions to customers, as I've built landing pages for businesses as a freelancer. At the same time, maintaining the drive to stay motivated to keep learning and growing as a professional in this field.

I'm a huge fan of volunteering, and I love witnessing growth in people, especially young folks who I'm able to help better.

EXPERIENCE

- Instructional Facilitator (Volunteer), **IEEE PRE-UNIVERSITY AMBASSADORS STEM PROGRAM**, Mar 2022 - Current, Lagos Nigeria
- I deliver talks and facilitate hands-on practical projects for secondary school students in Nigeria.
- We show them what can be built with skills revolving around STEM, hence increasing their passion for pursuing a career in STEM.

- Web Development Team Lead and Planning Committee Member (Volunteer), **IEEE Nigeria Students Congress 2022**, May 2022 - Jun 2022 Nigeria
- I was part of the committee responsible for managing all the administrative materials and congress registrations.
- Led the web development team into successfully developing a landing page for the congress using HTML, Tailwind CSS and Javascript. GitHub repo - *https://ieee-nigeria-students-congress-2022.netlify.app/*
- I worked with every web development team member, assigning tasks and bringing up the pieces built by each member by managing and merging their Pull Requests on Github, eventually hosting the project on Netlify.

- Web Developer, **Synergy Network International**, Mar 2021 - Jan 2022
- As a sole member of the development team for a few months, using Python, I built a full-stack Django website as a point of contact between youths looking for mentorship and mentors in the company. Website here: *https://synergynetworkinternational.pythonanywhere.com/*
- Built a "Quick Login" feature to display login forms to users and speed up authentication to about 15% faster as they won't have to navigate to the login page.
- Provided a satisfying User Experience with a smooth, animated user interface styled with Bootstrap.
- Used Jquery and AJAX requests to prevent page reload by blog actions (liking and commenting) for better User Experience.

FREELANCING

- Created a solution to increase the customer conversion rate of a football academy - used Next.js Server Side Rendering to speed up page load hence, a better User Experience.
